Top Skills

Python (Programming Language)
Data Analysis
Operative Dashboard

Certifications

AI for Beginners
Siemens Mobility - Project Manager Job Simulation
Codathon 3.0
Python for Beginners

Saiyam Bajpai

CS + Data Science Student @ IIT Madras & MITS Gwalior | Learning Python, Computer Vision, SQL & Data Analysis | Building Real Projects | Documenting every step
Gwalior, Madhya Pradesh, India

Summary

I'm a second-year student pursuing two degrees simultaneously — a BS in Data Science & Applications from IIT Madras and a BTech in Computer Science & Design from MITS Gwalior.I won't pretend I'm an expert. I'm at the start of a long journey — and I'm choosing to document every step of it here.What I'm currently learning and building: Python — NumPy, Pandas, writing scripts that actually do useful things# Computer Vision — OpenCV, Pycaw, and Mediapipe in Python to build interactive, vision-driven applications Web/App Dev — JavaScript (Node.js, React.js), NoSQL to solve real world problem using Application Operating Systems — Process scheduling, memory management, and concurrency control. Data Analysis & EDA — cleaning messy datasets, finding patterns, telling stories with numbers# SQL — querying databases, understanding how data is actually stored and retrieved Data Visualization — turning numbers into charts and dashboards that people actually understandThe IIT Madras online program pushes me on the theory. The BTech gives me the engineering depth. I'm using both to build real projects, not just pass exams.I post about what I'm learning — the struggles, the breakthroughs, and the small wins. If you're also learning data science or CS, we're on the same road. Let's connect. Open to: Internships · Research collaborations · Project partners · Mentorship

Experience

Sundarbans House IITM BS Degree
Member
December 2024 - Present (1 year 11 months)

CodeAlpha
Project based Certification
January 2026 - February 2026 (2 months)

Completed a remote Python certification based tasks, focused on building small, functional applications to strengthen programming fundamentals and logical thinking through hands-on tasks and real-world problem scenarios.

✳#Key Contributions:

Developed Python scripts using loops, conditionals, functions, and dictionaries

Implemented file handling and basic automation using regular expressions

Built console-based projects including a game, chatbot, and data-processing scripts

CodSoft
Python Developer intern
January 2026 - February 2026 (2 months)

•Participating in a 4-week virtual internship focused on learning and developing foundational Python programming skills.

•Gaining hands-on knowledge by executing assigned technical projects and tasks.

•Applying classroom concepts to practical, project-based work to build a technical foundation in software development.

•Ensuring excellence in work by following reasonable instructions and completing tasks diligently.

Education

Indian Institute of Technology, Madras
Bachelor of Science - BS, Data Science and Applications · (July 2024)

Madhav Institute of Technology and Science, Gwalior
Bachelor of Technology - BTech, Computer Science and Design · (August 2025 - August 2029)

AMI Shishu Mandir

Senior Secondary , PCM · (April 2024)

AMI Shishu Mandir

Higher Secondary · (March 2022)
